

ISS, Product Data, Ingredients and Usage

MINERAL DEPOSIT™: congested skin repair serum, 1 oz/37ml) *With AHA & BHA, COPPER & ZINC*

DESCRIPTION: This skin repair serum combines Alpha Hydroxy Acids to exfoliate dull ashen skin with Salicylic Acid to unclog congested pores. Vital liquid minerals of Copper and Zinc replenish moisture and balance adult skin undergoing hormonal changes and blemish flare-ups. Multi-functional botanical anti-oxidants soothe and protect the skin. Native American Indian extracts aid in skin respiration and cell oxygenation.

USE

Spread 3 drops evenly to clean skin alone or under moisturizer. Pat and press into the skin. May be used day and night.

KEY SELLING FEATURES AND BENEFITS

Free of detergent, synthetic color and fragrance

Centella Asiatica Extract: A member of the Umbelliferae family like celery, the active principle is asiaticoside with wound-healing properties.

Clintonia Borealis Root Extract: The wild flower, which grows in woodlands flower, was believed to stimulate secretions of the nasal mucous membranes. Contains certain cardiac glycosides and used in cosmetics as an anti-irritant. There is some research to show that it increases cell proliferation.

Geranium Maculatum: The roots of this plant were used by herbalists to treat canker sores, sunburn, and inflammation. It is being used in “anti-aging” products.

Spiraea Ulmaria Extract: Also known as Queen Meadow and a member of the rose family. Has toning, astringent and regenerative properties. The roots are rich in tannic acid.

Yucca Glauca Root Extract: In Native American traditions, the root of Yucca was used in salves or poultice for sores, skin diseases, inflammations, to stop bleeding.

Glycoprotein: Biotechnologically-derived oligopeptide specialty. Said to be highly stimulating to cell respiration and boosts the skin’s immune system.

Salicylic Acid: A beta hydroxyl acid, salicylic is a fat soluble component that exfoliates at the stratum corneum level of skin. Obtained from willow bark, wintergreen leaves sweet birch and other plants.

Glycolic Acid: A water-soluble member of the alpha hydroxyl family that is found in sugar cane and has the smallest molecular structure of the AHA’s. Used to control the acid/alkali balance in cosmetics. Known for activating the skin’s regenerative processes, increasing moisture-binding capacity, and enhancing elasticity. Some research indicates it is able to active collagen formation and reduces age spots.

Zinc: The most current research indicates that Zinc has natural sun protective properties, helps to improve acne blemished skin and conditions the skin. From the zinc salt of PCA.

Copper: A natural mineral that provides the skin with nutrients as well as conditions the skin.

Ingredients: Water, SD Alcohol 40, Butylene Glycol, Centella Asiatica Extract, Clintonia Borealis Root Extract, Geranium Maculatum Extract, Spiraea Ulmaria Extract, Yucca Glauca Root Extract, Glycoproteins, Mandarin Orange Fruit Extract, Bergamot Oil, Orange Oil, Copper PCA, Zinc PCA, Polysorbate 20, Citric Acid, Glycolic Acid, Hydroxyethylcellulose, Lactic Acid, Malic Acid, , Propylene Glycol, Salicylic Acid, Sodium Citrate, Chlorphenesin, Diazolidinyl Urea, Methylparaben, Propylparaben, Sodium Hydroxymethylglycinate
